

Docker

Docker Commands

Docker Installation

You can download Docker from the official site based on your operating system:

Windows, macOS and Linux: [Docker Desktop](#)

Installation guide: [here](#)

Once installed, make sure Docker is running by using:

```
$ docker --version
```

Docker Commands

```
docker run -d -p 8080:80 nginx
```

```
docker ps -a
```

```
docker stop <container_id>
```

```
docker start <container_id> (docker run will create new container)
```

```
docker rm <container_id>
```

```
docker images
```

```
docker rmi <image_name>
```

Docker Commands

```
docker pull <image-name>:<tag>
```

```
docker container prune (to delete all inactive containers)
```

```
docker logs <container-id>
```

```
docker inspect <container-id>
```

```
docker stats
```
